

WINZ TECHNOLOGIES

Job Description Form

Division/Department	Engineering		
Location	Lebanon, OH		
Job Title	Project Engineer		
Reports to	Jay Perin	<i>Title</i>	Vice President & CTO

Level/Grade	n/a	Type of position:	Full-time	Classification:	Exempt
-------------	-----	-------------------	-----------	-----------------	--------

GENERAL DESCRIPTION

Position:

Will serve as a staff engineer for a small growing company. Duties will include Embedded SW/HW specification/design/test/qualification, component evaluation/selection, product documentation and configuration management, assembly process (i.e., systems and procedures) development and control.

Company:

WinZ Technologies is a small, but growing, product development and light manufacturing firm. Products are extremely sophisticated and serve the automated vending industry.

Opportunity:

This is an extremely good opportunity for someone who values "front-to-back" engineering assignments, and is capable of shining in a small company environment. Full benefits include medical/dental insurance, 401K, vacation.

Contact:

HR@winztechnologies.com (Principals only, please.)

WORK EXPERIENCE/SKILLS REQUIREMENTS

- Software development in a structured environment (design rules conformance, version control, configuration management).
- Solid skills in C, C#, real-time embedded software development.
- Some experience with object-oriented software design and WinXP app development would be desirable.
- Some experience with digital circuit design, component selection, and/or network design/support would be desirable.
- General knowledge of product safety certification process would be desirable.
- Reliable, well-organized, competent communicator (spoken/written).

EDUCATION REQUIREMENTS

- BSEE/BSCE or equivalent
- Additional relevant certifications desirable (CNE, PMP, ISO9001, etc.)
